

GETTING YOU AFFORDABLE CARE

David believes quality, affordable healthcare should be available to all Americans. It is important to enact reforms that lower the cost of healthcare while maintaining access to healthcare for America's most vulnerable populations – like the elderly, poor and those with pre-existing conditions.

David believes the best healthcare is a market-based approach to healthcare reform that provides individuals with competitive choices and addresses the needs of those unable to afford healthcare insurance. It is David's priority to ensure your healthcare remains in the hands of you and your doctor, not the federal government.
